Another exciting year for Baldrige & Associates Structural Engineering, Inc. has come to a close. Below is a list of select highlights from 2007 that would not have been possible without the support of our clients and our outstanding team of dedicated BASE employees:

- Having been honored as finalists in the Pacific Business News Business Leadership Hawaii awards every year since 2003, this year we are pleased to announce that BASE has won the designation of **Best in Business II** (businesses with less than 100 employees). This award is judged based on performance in five areas:

- ▷ Leadership
- ▷ Good business practices
- ▷ Innovation
- ▷ Workforce engagement
- ▷ Customer commitment

- The **Architecture Construction Engineering (ACE) mentor program** provides public school students with the opportunity to learn about the profession. This year BASE facilitated the participation of Moanalua High School in their submission to the Construction Industry Roundtable national design competition. We were honored to accompany them to Washington D.C. for their presentation and were proud to watch them win.

- BASE has had success in several significant **design/build competitions**, including:

- ▷ Hawaii Regional Security Operations Center (HRSOC)
- ▷ C-17 Hangar
- ▷ Honolulu Airport parking structure

- In addition to great work in 2008, BASE will continue to strengthen its leadership in sustainable design:

Steven Baldrige is both an invited speaker and member of the scientific committee that provided peer review for the many excellent papers submitted to the **Council on Tall Buildings and Urban Habitat (CTBUH) 8th World Conference, "Tall and Green: Typology for a Sustainable Urban Future,"** in Dubai, UAE.

BASE looks forward to the new opportunities and exciting challenges that the new year will bring, as well as the chance to forge relationships with our clients that will last well into the future.
