BASE is excited to announce the opening of its new branch office in Guam. This is the culmination of having worked in Guam for over ten years, primarily on military projects. As the leading structural and AT/FP consulting firm in the Pacific, this new location will allow our office to better serve our clients on public sector work with an added emphasis on private-sector projects. Our latest experience in Guam includes:

- **Guam Fitness Center**, Main Naval Base, Guam. The design and construction of a new consolidated indoor fitness facility, an outdoor 50 meter 10-lane swimming pool with change house, a lighted outdoor synthetic playing field and an outdoor track. Estimated construction cost: \$33 million.
- **P-532 Potable Water**, Main Naval Base, Guam. Structural work includes a new concrete generator building for the Navy Lake Pump Station and an addition to the existing pump station building. The structures are designed for a high level of protection under explosive charge design loads. Estimated construction cost: \$31.4 million.
- **Joint Region Marianas Headquarters**, Nimitz Hill, Guam. The repair, upgrade and conversion of an existing high school to the 50,000 square foot Joint Region Marianas Headquarters. The structural work includes seismic and security evaluations and rehabilitation. Estimated construction cost: \$18.7 million.
- **Consolidated War Reserve Material (WRM) Storage Facility**, Andersen AFB, Guam. A 111,000 square foot concrete and steel warehouse facility with clear spans exceeding 125 feet. Located adjacent to the airfield taxiways, this facility protects assets that are stored for deployment from the extreme environmental conditions possible in Guam. Estimated construction cost: \$13 million.

Additional Guam projects have included:

- **Guam High School**, U.S. Naval Hospital Compound, Guam
- **CDR McCool Elementary/Middle School**, Hagatna, Guam
- **Guam Army Reserve Center**, Barrigada, Guam
- **Munitions Storage Igloos**, Andersen AFB, Guam
- **DoDEA Elementary School Repairs**, Andersen AFB, Guam
- **Tropicana Hotel Renovation**, Tumon Bay, Guam

BASE looks forward to being an integral part of Guam's future growth.
