NATIONAL WORKSHOP ON PREVENTION OF PROGRESSIVE COLLAPSE

The National Institute of Building Sciences has identified Steven M. Baldrige, P.E., S.E. as an expert in the engineering profession. He was invited as a member of an elite group of 60 practitioners, researchers, academicians and government agency representatives to participate in the **National Workshop on Prevention of Progressive Collapse** held July 10th through 12th in Chicago, Illinois. *“This workshop serves as a benchmark to assess resources needed to develop standards for new and existing residential buildings,”* said H.S. Lew, National Institute of Standards and Technology senior research engineer and workshop coordinator. As a result of this workshop, an action plan that will guide the development of guidance documents and code provisions is currently in development.

Should you require additional information, please feel free to contact our office at 534-1300.
